

CEO Greeting

日日新又日新 (Be new and new everyday)

Hello.

Thank you for visiting our homepage.

The lighting market has undergone major changes over the past decade.

A number of companies entered the LED lighting market.

However, due to the low entry barriers and excessive competition, 70% to 80% of companies have already been culled.

Even today, most lighting companies are struggling with low added value and excessive competition.

Even though in this harsh market environment, e-GM Tech has consistently double-digit annual growth in proprietary technology and specialized products.

e-GM Tech has been in the business which is focused on the development of technologically differentiated outdoor products since its inception.

And also thanks to continuous development and improvement of seven years floodlights, we have the quality of world-class.

Price competitiveness is also very high compared to comparable other similar level of companies products.

Based on these accumulated technologies, we have carried out various projects.

- POSCO Vision Inspection lighting, lighting for a HYUNDAI automotive test chambers, test light for rail vehicles, EMC Free lighting

- LG Display LCD inspection lighting, UV lighting for water processing, underwater shooting lighting

e-GM Tech believes that customer and employee happiness is the best value

We always do our best to make customers and employees laugh brightly.
