EGM TECH lighting business in Vietnam is accelerating

EGM TECH lighting business in Vietnam is accelerating.

The raw materials to be sent to Vietnam will arrive at the Vietnam plant in mid-January, and OJT and trial operation for full-scale local production will be carried out by the end of January.

In addition, we are preparing for a vigorous business activity such as signing a sales partnership with several local lighting companies for local marketing in Vietnam.

We expect EGM TECH products to show good quality to the Vietnamese lighting market.

Global in issue (happy new year 2019)

The year 2019 has begun. Citizens of many countries come to the square to celebrate the New Year.

Most people are celebrating and expecting 2019 with a variety of messages.
