EGM Tech global business

EGM TECH visited Australian and Indonesian trade delegations in March this year to revitalize overseas business.

We did not expect big results. In Australia, however it showed positive reviews and interest in its products.

And one buyer has proposed an Australian related distributor and is in discussion with the distributor.

Indonesia is in contact with buyers who are mainly involved in the government business, and is conducting product proposals and lighting simulations for related product environments.

EGM TECH is marketing with an important meaning in forming a continuous relationship with foreign buyers.

We look forward to seeing even better results.

Global Issue\_2020 Tokyo Olympic

The Olympic Games will be held in Tokyo in July 2020. A total of 33 games are scheduled.

In particular, This Olympic Games can only be added another Games by the Japan Organizing Committee.

There are 5 additional games (softball, karate, skateboarding, surfing).

Tokyo is in the process of building a new facility to build new structures and to recycle the facilities in 1964.

The objective of the Tokyo Olympic Games in Japan will be to become the greatest Olympic Games in the world with the smallest budget in the name of the "Compact Olympics" which recycled old facilities.

The National Stadium, which was used for the 1964 Tokyo Olympics will be newly remodeled in 2020. And the point to be used for sports and cultural events.

Product in issue

**LED Flood lighting 600W**
