Lighting into What is energy harvest

What is energy harvester

Types of energy that can be collected
It is a technology that makes it possible to collect energy that is discarded without thinking and call it electricity.
As shown in the figure, it is a technology that collects energy converted into energy from the ambient energy, sound, and heat, and uses it in the form of electricity.
In addition to these technologies, there is also a device that converts energy waste, and energy storage.

MADE IN KOREA
Product name: G Harvester
Product code: G-HV-001
Phone: 02-6394-1111

Product list

Item	Reference	Dimension	Weight
Harvester	001	100x100x10	10g
Mount	002	100x100x10	10g

Easy to installation

- Remove 3M from the back of the product.
- Remove 3M from the back of the product.
- On the product in LED display.

Lighting View

EGM Tech has the first contract for the market business for year. It is the second contract shipment since.
EGM Tech can see that the Vietnamese branching project is being implemented.
The purpose of the second shipment and localization is to bring a product line for securing lead with Korea in Vietnam. It is also aimed to ship finished products for smooth circulation of finished products.
In addition, we asked local construction companies and related companies in Vietnam to display lighting inside from floorlight to streetlight.
We will also participate in architectural lighting exhibition in Hanoi, Vietnam in September.

Product in each view

LED PLUS LONGSHOO 80W (GVF5000)

Suitable for instant dimming and dimmable with a variety of light

Product code: GVP-5000
Product name: LED PLUS LONGSHOO 80W (GVF5000)
Product size: 100x100x10mm
Product weight: 10g

Specification

Item	Value
Power	80W
Voltage	AC 100-240V
Color temperature	2700K, 4000K, 5000K, 6000K
Beam angle	120°
Life span	50,000 hours

Application

Residential, Commercial, Industrial, Outdoor
