

## News Letter\_June.2019\_Monthly News letter

Recently, EGM TECH exported 150 samples, including factories, to The factory in Indonesia for sample installation.

In particular, Indonesia was very difficult to export because of the strict regulations on customs. However, the success of the company has made it possible to increase its overseas export capacity.

As the supply of domestic lighting market becomes more difficult, Vietnam is exporting not only to Indonesia but also Japan, the Middle East and Southeast Asia based on the introduction of the branch office in Vietnam.

On April 17, the President of Indonesia, who is sure to be president, is touring the candidates shortly after he decides to relocate the capital.

Presently, before the presidential election, many presidents have promoted the relocation of the capital but the relocation has not occurred.

The presidential election is expected to take up 60 percent of the parliamentary seats in the ruling coalition party, and it is expected that the transfer of capital will be approved by the National Assembly.

He said that he has traveled to the eastern part of Indonesia by reason of balanced national development and considered it as a convenient capital destination for transportation with major cities.

If the capital is transferred in this way the balance of development will become more active and the regional economy will be revitalized and the construction business will be actively promoted and the surge of the indirect high-rise buildings of the capital Jakarta will be resolved.

**Lighting for construction work**

LED 170W cylindrical lighting suitable for indoor construction work lighting

**Product Features**

**01. Indoor work lighting**

High brightness 170W LED  
High beam angle 120°  
High power 170W

**02. Connectable**

200V Connecting (40 to 10 connectors available to use)

**03. Portability**

Light weight design  
Carry weight 12kg (without using cable)  
Carry weight 15kg

**04. Able to separate**

Separable top and bottom of product

**Specifications**

LED	Material	Beam angle	Color	Color
170W	Aluminum	120°	White	White
Beam angle	170W	120°	White	White

Power	Input voltage	Max. Cable length	Material	Weight
170W	AC 200V	2000 X 10'	Aluminum	12kg (without using cable) 15kg (with cable)

**Product dimensions (1032mmx452mmx312mm)**
